Contraindications, Adverse or Other Reactions:

None known

Why These Natural Ingredients?

Evening Primrose Oil

Chosen for its GLA content, Evening Primrose Oil is an excellent source of high grade GLA, which is thought to be effective because of GLA's ability to help balance prostaglandins. The efficacy of our Evening Primrose Oil is due in part to the high potency in our 1300 mg capsule, which also makes it easier to take the required dosages prescribed by your doctor.

Used for years to benefit healthy skin, Evening Primrose Oil is one of the most widely used female-oriented supplements.

Note: Studies have shown that women with increased blood loss and PMS symptoms have an increased likelihood of high levels of arachidonic acid, a precursor to prostaglandin formation. GLA-rich oils like Evening Primrose Oil are known to lower the amount of type 2 prostaglandins in women.
