BIO MATRIX M.D.

Why These Natural Ingredients?

Time-Release Niacin

Niacin continues to be one of the most studied, and most recommended supplements. Niacin is considered first-line therapy by nearly every panel, including NCEP (The National Cholesterol Education Panel), for improving blood lipids related to cardiovascular health.

Our time-released form of niacin not only maintains the helpful lipid modification seen with instant release forms, it dramatically reduces the flushing effect allowing more people to realize the benefits of niacin. Our wax-coated technology permits a release that is complete in 7-8 hours, considered ideal for a time-release niacin.

Benefits of Niacin include:

- * Lowering of total and LDL cholesterol
- * Reduction of Triglycerides
- * Elevation of HDL cholesterol
- * Lowering of Lp(a), an independent risk factor
